

(Type R12W; year of construction 2014 ->

„Even with 1.65 m you can drive adventure!“  
Lucy Glöckner Wilbers-BMW-Racing

The Wilbers suspension can be ordered in Nordhorn right away and has the following features: Individually built, reliable shock absorbers of the proved and tested Wilbers technology:

**Standard length and lowering - 35 mm, - 55 mm und - 80 mm - FRONT without ESA**

**Adjustline 630 Mono Road**

The slim 36 mm radial-pistons in smoothed precision cylinders offer best function without any space problems.

- Continuously adjustable spring preload using included spanner tool.
- 22-times adjustable in rebound damping.

Lowering 35 mm  
Part-No. 630-1137-01  
**479 EUR**

Lowering 55 mm  
Part-No. 630-1137-02  
**479 EUR**

Standard length  
Part-No. 630-1137-00  
**479 EUR**

Lowering 80 mm  
Part-No. 630-1137-03  
**479 EUR**

**Adjustline 632 Mono Road**

The slim 36 mm radial-pistons in smoothed precision cylinders offer best function without any space problems.

- 22-times adjustable compression damping.
- Continuously adjustable spring preload using included spanner tool.
- 22-times adjustable in rebound damping.

Lowering 35 mm  
Part-No. 632-1137-01  
**629 EUR**

Lowering 55 mm  
Part-No. 632-1137-02  
**629 EUR**

Standard length  
Part-No. 632-1137-00  
**629 EUR**

Lowering 80 mm  
Part-No. 632-1137-03  
**629 EUR**

**Standard length and lowering - 35 mm, - 55 mm und - 80 mm - REAR without ESA**

**Adjustline 640 Mono Road**

The robust: Equipped with a 46 mm piston they cope with all impacts, offer multiple adjustment options and are available in many different types. They are real competitors!

- Continuously adjustable spring preload using included spanner tool.
- 22-times adjustable in rebound damping.

Lowering 35 mm  
Part-No. 640-1137-01  
**499 EUR**

Lowering 55 mm  
Part-No. 640-1137-02  
**499 EUR**

Standard length  
Part-No. 640-1137-00  
**499 EUR**

Lowering 80 mm  
Part-No. 640-1137-03  
**499 EUR**

**Adjustline 642 Mono Competition**

The robust: Equipped with a 46 mm piston they cope with all impacts, offer multiple adjustment options and are available in many different types. They are real competitors!

- 22-times adjustable in low-speed compression damping.
- 22-times adjustable in high-speed compression damping.
- Continuously adjustable spring preload using included spanner tool.
- 22-times adjustable in rebound damping.

Lowering 35 mm  
Part-No. 642-1137-01  
**799 EUR**

Lowering 55 mm  
Part-No. 642-1137-02  
**799 EUR**

Standard length  
Part-No. 642-1137-00  
**799 EUR**

Lowering 80 mm  
Part-No. 642-1137-03  
**799 EUR**

**Hydraulic preload adjuster type 625**

Hydraulic spring preload (PA) to adjust the riding level during motorsports or to setup for additional loads! Maximum adjustment range (10 mm) +/- 5 mm ... Assembly bracket included in delivery. **Information necessary, if BMW luggage system is mounted.**

Part-No. 625-0046-00  
**199 EUR**

**Ride height adjustment type 629**

Variable ride height adjuster to modify riding geometry for motorsports. The shock can be changed in length for a maximum of 10 mm +/- 5 mm shorter or longer! This accessory is not possible for all models.

Standard length  
Part-No. 629-0000-00  
**49 EUR**

**Standard length and lowering - 35 mm, - 55 mm und - 80 mm - FRONT**

With the newly developed feedback adjustments inside the compression tank you decide for yourself how strong the feedback of your suspension elements has to be. You reach the maximum comfort (original BMW) in the soft-setup. More clicks mean more information about the road's surface!

In addition to the standard riding height the suspension will be offered for lowering 35 mm, 55 mm or even 80 mm so that the BMW R 1200 GS Adventure LC is available for everyone. By lowering the seating height using front and rear shock absorbers the original riding geometry is kept. The individual setup, the plus in feedback and the right seating height will improve your riding behavior as well as your safety to the maximum.

Send your original shock absorbers to us or to one of our service point partners, state your weight and rider's data as well as the desired lowering. Within 14 working days we'll send you your individual suspension for your GS.

Standard length  
Part-No. 634-1137-00  
**649 EUR**
